MULTI SYSTEMS

WHAT ARE MULTI SYSTEMS?

Multi System air conditioning is ideal where individual air conditioning units are required in more than one room, for example one for the bedroom and one for the living area.

A Fujitsu Multi System allows for a variety of up to six individual indoor air conditioning systems to be connected to just one compact outdoor unit.

Each individual air conditioning system can be controlled separately using an individual remote.

Multi Systems can be installed in a variety of applications from homes and offices to multi story buildings.

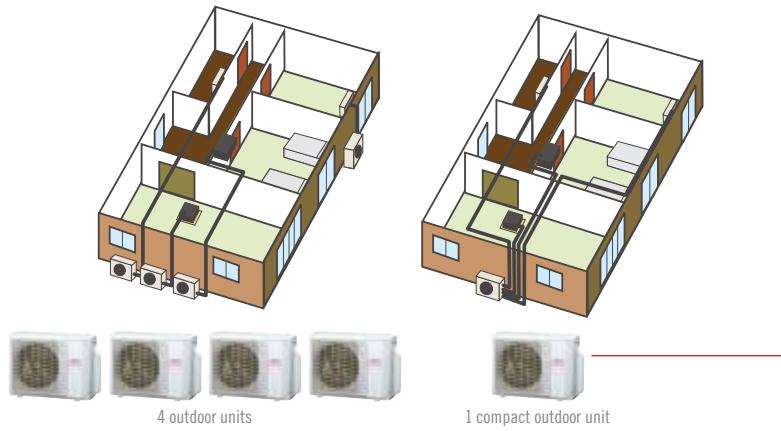

WIDE RANGE OF OPTIONS

The Fujitsu range includes 7 different indoor types and 14 different models ranging in capacity class from 2.0kW to 7.0kW. With such a wide range of options to choose from, there's a combination to suit almost any application.

FLEXIBLE INSTALLATION

Multiple indoor units can be connected to one outdoor unit rather than multiple outdoor units. This means greater installation flexibility and space saving options. Long pipe runs offer even greater choices for installation.

MULTI SYSTEMS

THE NEW 5 AND 6 ROOM MULTI SYSTEMS

The new Fujitsu General 5 and 6 room Multi Systems are easy and efficient to install whilst offering more flexibility to accommodate the diversity of modern home design. With just one unit installed outside, the 10kW unit has the capacity to cover two to five rooms, and the 12.5kW outdoor unit can have up to six indoor units connected.

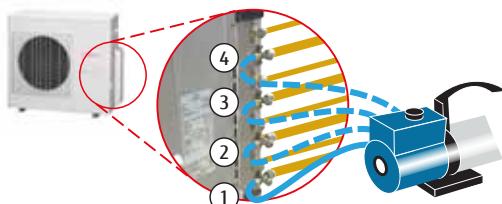

Central Controller (optional)

- Operation is simple with the optional large backlit LCD central controller
- The four-way navigation pad enables control of the indoor units individually or simultaneously
- Each unit can be monitored, and features such as economy mode, remote control prohibition or low noise mode settings can be activated from one central point

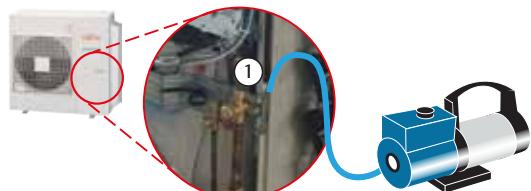

EASY INSTALLATION

Fitting the new systems has been made easier - a centralised valve allows vacuuming to be performed from one location. This reduces installation time on systems as previously the evacuation process had to be performed up to four times. Installation has been made simpler with the pipe connection location optimised, and a commissioning mode is inbuilt for automatic wiring and piping checks from the outdoor unit.

COMFORT FUNCTIONS

POWERFUL MODE*

This mode will operate the air conditioner at maximum capacity for 20 minutes, providing comfort faster than ever before.

AUTOMATIC FAN SPEED

The micro processor automatically adjusts the airflow effectively to follow the changes of room temperature.

DOUBLE SWING AUTOMATIC*

Complex swing action of the louvres enables the unit to swing automatically both horizontal and vertical directions.

10°C HEAT OPERATION

The room temperature can be set to go no lower than 10°C, ensuring that the room does not get too cold when not occupied.

RIGHT / LEFT SWING LOUVRE*

The right / left louvre automatically swings in either direction.

AUTOMATIC LOUVRE

The position of the louvres is set automatically to match the operating mode. It is also possible to adjust the louvres using the remote control.

AUTO SHUT LOUVRE

The auto shut louvres close or open automatically when the unit stops or starts.

AUTO-CHANGEOVER

The unit automatically switches between heating and cooling modes based on the temperature setting and room temperature.

POWER DIFFUSER

An additional louvre that opens based on monitoring sensors to quickly enhance immediate comfort needs.

CONNECTABLE FRESH AIR DUCT*

Allows introduction of fresh air to occupied space.

CONNECTABLE DISTRIBUTING DUCT*

Systems are capable of attaching field-supplied branch ducts distributing the airflow.

UP / DOWN SWING LOUVRE

The up / down louvre automatically swings up and down.

AUTO RESTART

In the event of a temporary power failure, the unit will automatically restart in the same operating mode as before, once power supply is restored

FRESH AIR INTAKE*

Fresh air can be taken in by a fan which can be connected using an external control unit.

CONVENIENCE FUNCTIONS

SLEEP TIMER

The micro-processor gradually changes the room temperature, allowing you to sleep comfortably at night.

PROGRAM TIMER

ON, OFF can be set up to 4 times in 1 day and up to 28 times in 1 week.

WEEKLY TIMER*

Different ON-OFF times can be set for up to 7 days.

WEEKLY + SETBACK TIMER*

The compressor speed and the outdoor unit fan speed are limited to reduce the operational noise.

SUPER QUIET MODE

The indoor units fan can operate at a low speed to produce quieter operation.

ENERGY EFFICIENT FUNCTIONS

HUMAN SENSOR*

The human sensor detects movement so that when occupants leave the room, the air conditioner switches into energy saving mode after 20 minutes should no movement be detected. When occupants re-enter the room, it returns to normal operation.

V-PAM

V-PAM inverter technology increases the maximum output of the compressor significantly and enables high power and high efficiency.

i-PAM

i-PAM inverter technology enables high output and high efficiency performance.

DEMAND CONTROL

This product is designed to be compatible with Air Conditioning Demand Response program. When your electricity supplier activates one of the three modes, the air conditioner switches over to the appropriate operation.

ECONOMY MODE

The economy operation will save energy in heating, cooling and dry mode. Economy operation is set by pressing the button on the remote control.

CLEAN FUNCTIONS

LONG-LIFE ION DEODORISATION FILTER*

The filter deodorises by powerfully decomposing absorbed odours using the oxidising and reducing effects of ion generated by the ultra-fine-particle ceramic.

WASHABLE PANEL*

Dust which accumulates on the air conditioner can be easily cleaned with a damp cloth.

APPLE-CATECHIN FILTER*

Fine dust, invisible mould spores and harmful microorganisms are absorbed onto the filter by static electricity and further growth is inhibited and deactivated by the polyphenol ingredient extracted from apples.
